

CASE STUDY

Winterstoke Hundred Academy

Summary:

- Initially supplied to North Somerset Enterprise and Technology College – a free school specialising in Science, Technology, Engineering and Maths (STEM)
- Maintained the annual service contract when it converted to Winterstoke Hundred Academy
- 5 x fume cupboards including ducted & ductless (recirculating) units on dedicated science floor of £12M new building

Detail:

Winterstoke Hundred Academy (formerly North Somerset Enterprise and Technology College) is a coeducational secondary school and sixth form located in Weston-super-Mare. It is a free school sponsored by the Cabot Learning Federation.

Safelab was asked to supply and install the fume cupboards for the school when its new building was constructed by BAM in 2016. In total, we supplied 2 x mobile ductless (recirculatory) Airone 1000RS units, 3 x fixed ductless units (1 x Airone 1200R; 2 x Airone 1000R) and 5 docking stations.
