

Airone 1000DS Semi-Mobile Ducted Fume Cupboard

Tested by CLEAPSS the new Airone 1000DS Semi-Mobile Ducted Fume Cupboard has been designed to comply with BS EN14175 for ducted fume cupboards and Building Bulletin 88 from the Department for Education and Employment.

The intelligent design of this cupboard creates a fully ducted system which is semi-mobile. The Airone 1000DS' design has two major advantages:

- 1 The teacher and pupils are protected from the effects of the substances being used as harmful fumes/irritants are removed at their source and ducted away from the classroom environment entirely to atmosphere.
- 2 Easily stored to the side of the room the cupboard can be wheeled into an open position for demonstrations. With 360° visibility everyone can see what is happening and the teacher is facing the class as the demonstration takes place.

The Airone 1000DS boasts a wealth of benefits

- Air By-pass System
- Sliding Front Sash
- Low Airflow Alarm
- Large Front Aperture
- Integral Storage Cupboard
- Restraining Stainless Steel Tether
- No Replacement Carbon Filter Costs

Options

- Remote Gas Service
- Remote Water Service Including Drip Cup and Bottle Trap
- Electrical Socket
- Cast Epoxy or Stainless Steel Tray
